### Reading Comprehension Guide

**Name:**

**Grade:**

**OF 1.** Comprender e interpretar textos escritos de tipo instructivo, narrativo y descriptivo de mayor complejidad lingüística y temática y de una extensión variable, de acuerdo al propósito comunicativo del texto

**OF 4.** Expresarse por escrito completando información personal o laboral y/o redactando respuestas simples a cuestionarios.

#### **I. Read the next instructive text**

**IMPORTANT:** An **Instructive Text** tells you how TO DO something. (Un texto instructivo como lo dice la palabra indica instrucciones. Nos dicen como se hace algo, como lo hace una receta, manual de cualquier artefacto electrónico o instructivo de cualquier clase)

### **What to do During an Earthquake?**

Wherever you are when an earthquake starts, take cover immediately. Move a few steps to a nearby safe place if need be. Stay there until the shaking stops.

- Stay calm! If you are indoors, stay inside. If you are outside, stay outside. Drop under heavy furniture such as a table, desk, bed or any solid furniture.
- Stay away from windows and lamps.
- Cover your head and torso to prevent being hit by falling objects.
- Hold on to the object that you are under so that you remain covered. Be prepared to move with the object until the shaking has finished.
- If you can't get under something strong, or if you are in a hallway, flatten yourself or crouch against an interior wall and protect your head and neck with your arms.

- If you are in a wheelchair, lock the wheels and protect the back of your head and neck.
- If you're outdoors, stay in the open away from power lines or anything that might fall. Stay away from buildings (stuff might fall off the building or the building could fall on you).
- If you're in a car, stop the car and stay inside the car until the earthquake stops
- Don't use elevators (they'll probably get stuck anyway).

**II. Match the instructions from the text with the correct picture. Put the numbers in the box.**

1. Stay away from buildings, walls or power poles.
2. Drop under a furniture
3. If you are driving, stop the car
4. Cover your head and torso under the furniture
5. If you are in a wheelchair, protect your head and back
6. Hold on to the furniture and take cover

**III. Answer the following questions with short answers**

1. During an earthquake, if we are indoors, we must drop under....

---

2. What should we do if we are in a wheelchair?

---
